

Cisne

Swan

1. Begin with the bird base. Sink the top half-way.
2. Turn the model upside down.
3. Swing the top flap downwards. Repeat behind.
4. Inside reverse-fold the top right flap to form the tail.
5. Inside reverse-fold the tail. Valley-fold the bottom flap to form the wing. Repeat behind.
6. Inside reverse-fold the corner of the wing. Repeat behind.
7. Narrow the neck and the tail with mountain folds.
8. Inside reverse-fold the neck to form the head.
9. Crimp the head to form the beak.
10. Shape the beak, the neck and the body.
The completed Swan.
